

Your one-stop service for electric vehicle drive kits

We offer a full range of products for electric cars, motorcycles, motorboats and bicycles, including a comprehensive variety of drive kits. We also supply parts and accessories, as well as compatible replacement parts. You can source electric car and motorcycle motors, high-end battery packs, and related controllers. With our one-stop service, you don't need to look elsewhere to find compatible parts or accessories.

Drawing power ranging from 5 to 20kW, and voltages from 24 to 120V DC, our motors last more than 20,000 hours, are water-resistant and have air-cooling or liquid-cooling options. Find out why Walmart's chosen to equip the shopping carts in its US superstores with our patented hub motors by contacting us today.

Bicycle, can be easily converted to run on electric power
